DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Wang et al. (5,128,103).

Wang teaches an automated magnetic sorter for separating predefined component from a sample, comprising a receptacle for bodily fluid sample vials and a microprocessor controlled magnet to allow user to select the strength of the magnetic field so as to control the flow of magnetic particles, see column 8. The sorter also comprises a robotic pipette system for removing components of the fluid samples which are not magnetically charged.

The limitation that the bodily fluid is blood has been deemed an intended use of the apparatus, and it has been held that a recitation with respect to the manner in which a claimed apparatus is intended to be employed does not differentiate the claimed apparatus from a prior art apparatus satisfying the claimed structural limitations. *Ex parte Masham*, 2 USPQ2d 1647 (1987).
